VICE CHAIR OF RESEARCH

The Department of Emergency Medicine at Weill Cornell Medicine and NewYork-Presbyterian is seeking a dynamic and visionary inaugural Vice Chair of Research for this rapidly growing department. The Vice Chair of Research will report directly to the Department Chair and will serve as a key member of the department’s leadership team. The individual will provide leadership and strategic oversight of the research mission for the Department, and its academic affiliates, including NewYork-Presbyterian Queens and NewYork-Presbyterian Brooklyn Methodist Hospitals. The current research portfolio totals several million dollars and is expected to grow significantly over the next few years. The Vice Chair must be highly motivated and entrepreneurial with demonstrated expertise in leading research initiatives. Diversity, inclusion, equity, and collaboration are fundamental principles of the Department and the Vice Chair of Research will help to promote these principles in this leadership role.

The Vice Chair will be an accomplished clinical and translational researcher with an MD or PhD in Emergency Medicine, Epidemiology, Global Health, Healthcare Delivery Science and Innovation, Health Services Research, Population Health, or a related field. This individual will be skilled at managing in a complex academic enterprise, have a strong vision for growth and focus on high impact research. He or she will have an outstanding record of innovations, success in extramural funding and program development, and publishing research results in high impact journals. The incoming Vice Chair will have attained the academic rank of Associate Professor or Full Professor at his/her institution.

This is an exciting opportunity for a dynamic and entrepreneurial leader who would like to have a broad national impact. The faculty in the department, and its affiliates, collaborate with local and national partners in cutting-edge scientific research funded by federal agencies, industry, and foundations. The Vice Chair will have full support of departmental, hospital and Medical College leadership. Significant resources, including data and statistical and analytical support, will be allocated to expand and diversify the department’s research portfolio.

The Department has a highly dedicated faculty, comprising of over 100 junior, mid-career, and senior members with a diverse mix of clinical, research and educational interests. The Department is a high volume, high acuity regional trauma, burn and stroke center caring for more than 90,000 adult and pediatric patients. Clinical faculty also have the opportunity to work at our New York Presbyterian-Lower Manhattan Hospital ED campus, which is a busy community hospital seeing 45,000 annual visits. Total annual ED visits across both campuses and affiliates are more than 375,000, which presents an ideal opportunity for research expansion and integration with innovative clinical efforts currently underway.

The Department’s research portfolio is comprised of programs in COVID-19 Pandemic Research, Telemedicine, Medical Toxicology, Geriatric Emergency Medicine, Wilderness Medicine, Global Emergency Medicine, Simulation, and Ultrasound. In addition, we offer fellowships in Geriatric Emergency Medicine, Healthcare Leadership and Management, Medical Education, Medical Simulation, Pediatric Emergency Medicine, as well as PA and NP residencies in Emergency Medicine.
